Applicant's election of Group I, claims 1-4, 6-16, 18, and 19 in the reply filed on February 23, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

It is again noted that claims 6-15, 18, and 19 are dependent on two inventions. Applicant has elected Group I and the claims should be amended to reflect the election. For example, claim 6 should no longer be dependent on claim 5.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Van Pelt et al (GB 1440182).

Van Pelt et al (GB 1440182) teach a whey protein stabilized emulsion as is claimed (see entire document, especially the Examples and claims 1 and 6).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-16, 18, and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Van Pelt et al (GB 1440182) in view of Soeds (EP 0966887).

Van Pelt et al (GB 1440182) disclose a whey protein stabilized emulsion (see entire document, especially the Examples and claims 1 and 6).

The claims differ as to the use of transglutaminase and the foodstuff base.

Soeds (EP 0966887) discloses a stabilized transglutaminase treated whey protein where the modified protein is used in gel-like foods, such as meat products, and emulsified dairy foods (see entire document, especially paragraphs 0038, 0039, 0040, and 0059 and claims 1, 18, and 19).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use transglutaminase as taught by Soeds in that of Van Pelt et al because the use of transglutaminase serves to stabilize whey protein.

Once the art has recognized the use of stabilized whey proteins in the art, the use and manipulation in different food products and conditions is no more than conventional in the art.
